

Norman County

As Minnesota's economy grows stronger, access to safe and affordable homes builds the foundation for living, working, and learning in all communities. Yet even working Minnesotans often lack good housing options, and aging homes create health and energy concerns.

In Norman County, there are about 2,278 owner and 585 renter households.¹ More than 50% of homes are at least 50 years old.²

For 21% of owners and 43% of renters in Norman County, housing consumes 30% or more of their household income.³ This can mean inadequate spending on other basic needs like food and medicine. **Saving for education or emergencies often becomes impossible, especially for lowest-income households.**

RENTER INCOMES LAG BEHIND RENTS

In Norman County, 20% of households are renters.⁴ In most Minnesota counties, **renter incomes have fallen as rents have risen.** According to recent data for Norman County, real renter incomes have fallen by 4%, while rents have risen by -3% since 2000.⁵

There are now **93 units affordable and available for every 100 extremely low-income renters** in Norman County.⁶ The county ranks 5 out of the state's 87 counties for the most units affordable and available to this income group.

RENTAL CHOICE KEY, BUT OPTIONS LIMITED

For many, renting makes sense. Young people starting out are often saddled with student debt. Seniors may not be able to afford or manage owning a home. Many do not have the savings or credit to qualify for mortgages. Workers relocating for jobs also need rental housing.

A safe, modest two-bedroom apartment costs \$637 per month in Norman County.⁷ At the median renter household income of \$25,480, a family could affordably spend \$689 per month on rent.⁸ By definition, half of the county's renters earn less than this median, and would need less expensive housing.

At \$8.00 per hour, the state minimum wage for 2014, an earner must work **61 hours per week⁹** to afford the \$637 rent for a modest two-bedroom apartment in this county.

Workers fill essential roles, but a job does not guarantee an affordable place to live.

The median earnings for many jobs do not cover actual housing costs, the chart below shows.¹¹

For vacant positions in Norman County and counties nearby, the median hourly wage is \$14.27 for full time jobs, which corresponds to \$29,682 annually at 40 hours per week. Vacant part time jobs only earn \$11.70 per hour.¹²

Owning a home.

80% of households in Norman County own a home. For white, non-Hispanic households, the county's ownership rate is 81%, compared to 56% for households of color. **As a state, Minnesota has the nation's largest racial homeownership gap.**¹³

- The median sales price for non-foreclosed homes is \$67,055 in Norman County, which is a real decrease of 4% since 2006.¹⁴
- From 2005-2013, there were 98 foreclosures in the county.¹⁵
- Statewide, 3.1% of primary mortgages were delinquent by 60+ days in early 2014, compared to an average of 1.7% from 1979 to 2004, before the foreclosure crisis.¹⁶

In Norman County 7% of owner and 17% of renter households pay half or more of their income for housing, a situation known as "severe cost burden."¹⁷

Unaffordable housing and homelessness affect people of all ages in Minnesota.

An estimated 14,000 Minnesotans were homeless on a given night in 2012. Homelessness increased 32% statewide from 2006 to 2012.¹⁸

On that 2012 night, 666 people were known to be homeless in the Northwest Region including:

- 195 children with their parents.
- 125 youth through age 21 living on their own.
- 68 seniors aged 55+.¹⁹

Without stable housing, children face higher barriers to success in schools.

About half of the people experiencing homelessness in Minnesota are 21 or under.²⁰ Homelessness can cause delays in growth and development, as well as problems in school. Housing subsidies have been linked with better nutrition and school success for poor children.

In 2012, 17% of children in Norman County were living in poverty, up from 11% in 2002.²¹

Housing needs among seniors are growing.

The number of households headed by seniors aged 65+ in Norman County grew from 714 in 2000 to 891 in 2008-12.²² Currently, 168 are renter households. Statewide, 3 in 5 senior renters pay more than 30% of their income for housing.²³ Seniors were also one of the fastest growing segments of the state's homeless population between 2009 and 2012.²⁴

Targeted investment can end homelessness.

Ending homelessness is possible with strategic public investment. For example, targeting housing and services to homeless veterans led to a 13% decline in homelessness for this group from 2009 to 2012 even as homelessness rose overall.²⁵
