

2017 County Housing Profile

Wilkin County

2,763 households | West Central region

Access to safe, affordable homes builds a strong foundation for families and communities. But too many Minnesotans lack good housing options.

Contrary to the state trend, the cost of rent has decreased – but not nearly as much as the decline in income, making it increasingly challenging for renters to make ends meet.

Income for families who own their homes is not rising nearly as quickly as home values – and homeownership among young families has decreased.

WAGES: Housing remains a challenge even for workers who are fully employed. The median earnings for most of the top in-demand and high-growth jobs do not cover housing costs at an affordable level. Those working at the median wage – and especially those earning the minimum wage – cannot afford a two-bedroom apartment or the mortgage for a median-value home.

HOMELESSNESS: Across the state, homelessness has declined since 2012, but too many families, seniors and children in the West Central region are still suffering the devastating consequences of having no place to call home.

HOUSING STOCK: While a significant portion of the rental and owner-occupied housing is aging (built before 1960), new construction is not keeping up with demand. Of particular concern is the gap between the number of available units for extremely low income households – and the number of people who need them.
