March, 2016

The Real Cost of Housing in Minnesota

The growing cost of housing in Minnesota hurts low to moderate income families and the communities they call home. From 2000 to 2014, the statewide median income declined among homeowners and renters, but housing costs increased, creating a housing cost burden for 1 in 3 Minnesota households.\(^1\) Stable, affordable housing is the foundation for building strong families and communities making the gap between incomes and housing costs a real threat to the long-term viability of Minnesota.

Housing Cost Burden Forces Tough Choices

Households that spend 30% or more of their income on housing are forced to make many tough choices with their remaining dollars. In Minnesota, the growing cost of housing makes it difficult for many workers to afford decent, stable housing:

- 3 in 5 households earning less than $50,000 are cost burdened (2014), spending 30% or more of their income on housing.\(^2\)
- Families must earn $17.20/hr & work 40hr/week to afford a 2br apartment (2015).\(^3\)
- Minimum wage earners must work 68 hours per week to afford a 1br apartment at 30% of their income (2015).\(^4\)

The Rental Market

Finding affordable housing is difficult for many renters in Minnesota because vacancy rates have been extremely low for several years, and rents have been increasing.

- Rent + 6%
- Income -16%
**Homeowner Market**

Across Minnesota, foreclosures and evictions are slowing to pre-recession levels. But for many homeowners, the income needed to afford a median priced home continues to increase.

**Homelessness Across Minnesota**

On a single night in 2015, over 7,500 Minnesotans were identified as homeless. Many of these individuals are children, younger adults, veterans, and chronically homeless individuals.

Wilder Foundation Statistics on Homelessness

2012, Statewide & Region Counts of Homeless People

- People who are 21 or younger make up 46 percent of Minnesota’s homeless population.
- The number of children in emergency shelters increased 44 percent from 2009 to 2012.
- Adults 55 and older only accounted for 8 percent of the homeless population, but their numbers increased 48 percent from 2009 to 2012.

**Recent Trends, New Directions**

With the number of foreclosures returning to pre-recession levels, affordable housing providers and advocates must refocus their work. The rising real cost of housing compared to incomes is a growing issue in most communities, especially for people at the lowest income levels.
