

Housing Affordability in Meeker County

2011

Minnesota Housing Partnership
Homes for all.

Housing is considered affordable if it consumes less than 30% of a household's gross income. At higher levels, families must choose between housing and other basic needs such as food or medicine.

For low-and moderate-income Minnesotans, extended economic hardship is a reality. The foreclosure crisis has left many homeowners owing more than their home is worth, while rents continue to rise.

Households Paying 30% or More of their Income for Housing ¹				
Household Income	RENTERS		HOMEOWNERS	
	Number	Percent	Number	Percent
Less than \$20,000	538	86%	553	82%
\$20,000 – \$34,999	143	38%	522	42%
\$35,000 – \$49,999	34	12%	477	39%
\$50,000 and over	0	0%	702	15%
All income levels	715	49%	2,254	29%

The burden of housing costs weighs more heavily on lower-income families, as the table shows. Renters are also more likely to face unaffordable housing costs.

RECESSION TAKES A TOLL. Even before the Great Recession, housing burden had increased substantially. Then from just 2007 to 2009, the number of Minnesota households paying more than HALF their income for housing grew by 9% (an increase of nearly 24,000 households) while the number of all Minnesota households increased by only 1%. **In 2009 the cost of housing consumed more than half of income for almost 1 in 7 Minnesota households, leaving many unable to pay for transportation, food, or other basic needs.**² In 2000, only 1 in 12 households experienced this level of cost burden.³

A SHIFT TO RENTING. In 2010, about 81% of Meeker County households owned their home and 19% were renters.⁴ With the foreclosure crisis, rental is becoming increasingly important. Statewide, home ownership rates have fallen to 73%, a significant drop since peaking at 76% in 2006.⁵ Minnesota homeowners owned an estimated 21,000 fewer homes in 2009 than in 2006.⁶
